MEMORANDUM FOR: DIRECTOR OF MATERIEL, DPD-DD/P

SUBJECT : J-75 Engine Support

REF : DPD-2224-59

1. Operational concept for employment of the U-2 with the J-75 engine is as follows:

a. Aircraft/J-75 engine location:

2 - Edwards AFB  
1 - Atsugi, Japan  
1 - Adana, Turkey

b. Each aircraft is programmed for 25 flying hours monthly.

2. Obviously the two aircraft deployed overseas will be operational; however, one of the Edwards airplanes will be configured as a test bed and will not be used for overflight missions. The second Edwards airplane will be maintained in an operational configuration and will be a spare mission aircraft available to be deployed to any site of operation for an overflight mission.
